

HILL & HILL PLUMBING Co.

SERVING THE AREA SINCE 1952

LICENSED MASTER PLUMBER
CF C055681

Celebrating Our 49th Year of Service!

June 1, 2001

Over the past two years, Baron's Jet Tec, LLC has been working with us cleaning drain lines for ten story condominiums to single family residences to sewer mains running through mobile home parks. All of these projects were a huge success due to Richard's 20-year experience with high pressure jetting. His careful planning, preparation and persistence in every job has resulted in 100% customer satisfaction. He confirms every job with a camera which gives the customer confidence the job was done right. When I schedule a job with Richard, I can count on him being there which helps me out with my busy schedule.

Baron's Jet Tec, LLC comes very highly recommended by Hill & Hill Plumbing Co. for anyone in need of any type of drain cleaning or maintenance.

Respectfully submitted

Re: Baron's Jet Tec, LLC

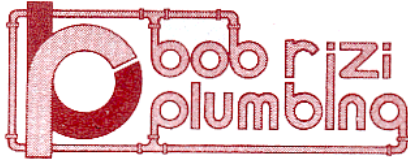

To Whom It May Concern,
Island Reef is a 173 unit condominium composed of six, five story buildings. The property is now over twenty years of age. Approximately one and one half years ago, Richard Baron and his crew cleaned our kitchen plumbing stacks to bring them back to their original size.

As Property Manager of this complex, I am pleased to say that we are very happy with the quality of work that was done and we have had no problems since that time with overflows and stopped up drains.

I give my highest recommendation to Baron's Jet Tec, LLC.
Cordially,

A handwritten signature in cursive script that reads "Liz Osterholt".

Dear Richard:

I have been using Baron's Jet Tec for approximately three years. I find your company gives Bob Rizi Plumbing an added dimension. In choosing Baron's Jet Tec, I now can offer my customers a wider base of services without having to purchase added equipment or train personnel. I have found that your company is consistently prompt and professional in addressing my needs. I would feel confident in recommending Baron's Jet Tec to any other plumbing professional.

Sincerely,

Mr. Richard Baron
Baron's Jet Tech
P.O. Box 17764
Sarasota, FL 34276

Dear Richard:

After the incident I had at the Airport Mall, I wanted to thank you and also let you know how I have come to trust and rely on your company.

Over the years, I have come to rely on your professional opinion which has helped me on countless events. Your service and knowledge on all aspects of plumbing related issues has been invaluable to me and the many tenants at the properties you have worked on.

I cannot stress strong enough how important it is to have a company, such as yours, working for me which is able to quickly diagnose and correct the problem at hand in an expedient manner. Because of that, I truly believe part of the success I have had in keeping my properties leased, is being able to provide the tenants with prompt service on any issues that arise and your company has been able to do just that.

Thank you again for the help at Airport Mall.

Sincerely,

Steven C. Band

To Whom It May Concern:

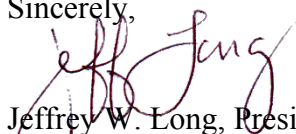

This is a letter of recommendation for Richard Baron of Baron Jet-Tec, a provider of drain cleaning services. This Association, a 10-story condo facility with 50 apartment units, contracted with Barons Jet-Tec earlier this year to perform a clean out of three main kitchen stack drains. These drains had been a continuing and increasing problem after over thirty years of service. Our traditional plumbing contractor had pressure cleaned the drains two years earlier and was recommending an annual treatment to keep them open and flowing.

On the advice of our management company, CMI, we brought in Barons Jet-Tec, which first performed a videorecorded analysis of our situation. This analysis clearly indicated severe blockage in all three 4" cast iron drains, and also suggested that the earlier pressure cleaning had been marginal, at best. Unlike the previous effort, which involved directing a high pressure water jet from the top of the building downward (a flush, if you will), the Barons approach was to start at the bottom, jet-clean upwards, and remove the detritus rather than attempt to flush it into the sewer. At the conclusion of the job, Barons again videoed the "finished product", and we now have visual proof of the state of our almost-new drains. The video also allows us to see the state of the pipe walls and feeder junctions floor-by-floor.

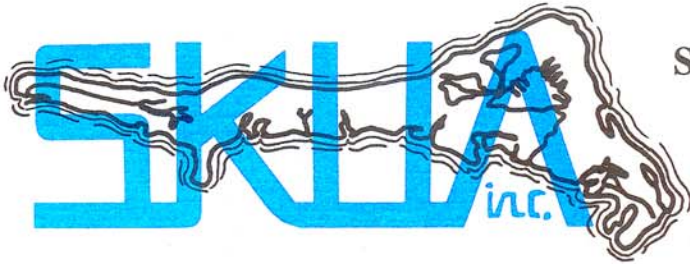

Although the cost of Baron's service was almost double that of the conventional service we employed earlier, we are confident we will get 5-10 times the life out of our drains than the annual treatment urged by others. I would not hesitate to recommend Richard Baron and his service to any facility looking for a proven drain clean-out project with visual evidence of its efficacy. The service was performed in a timely and professional manner with minimum disruption to our residents. Richard delivered what he promised, when he promised it, and for the price he quoted - a welcome change from some contracted projects we have had in the past.

Please don't hesitate to contact me if you have any further questions,

Sincerely,

Jeffrey W. Long, President

To Whom It May Concern:

Richard Baron of Baron's Jet Tec has been performing work for this Utility since he went into the jet cleaning business four years ago. The work has always been performed in a prompt and professional manner.

While we have a sewer cleaning truck, Mr. Baron has the equipment and experience to handle many jobs that our crews cannot. We have several ongoing contracts with him for regular sewer cleaning in problem areas and the work is always done on time and as contracted.

Recently Mr. Baron, after investigation and purchasing of a special head, was able to clean calcium carbonate from a line at our treatment plant. This was a job that others had tried in the past but could not do. This work saved us time, money and helped us avoid a major overflow.

Mr. Baron's fees have always been reasonable and we expect to continue using his expert services.

Very truly yours,

John H Lester
General Manager
